

**Instituto Tecnológico de Cancún**

**Materia:**  
**Fundamentos de Telecomunicaciones**

**Tarea:**  
**Concepto de SDN**

**Alumno:** Aguilar Moreno Jorge Axel  
**Docente:** Ismael Jiménez Sánchez

**Horario:** 17:00 – 18:00

**Ing. Sistemas Computacionales**  
**5.-Semestre**

## **Research the concept of SDN**

First of all to be able to describe the SDN we need to know what it means in its normal translation is software defined networks that have categorized it as something that is going or is revolutionized, everything that has to do with networks, it is considered as a programmable network easy to use which the person who manages it can manage the network, controlling the traffic so that it can be faster or more efficient being used as one of the companies such as the well-known Google.
